3D decals

•Soak the decal in the warm water for couple of seconds and after its separation from the backing paper position it on the model.

•To increase decal's adherence use the white glue, Mr. Mark Setter or apply to the glossy surface.

•Leaving decal in the water for too long can cause its swelling and distortion.

PE parts

•Use cyanoacrylate glue to attach.

3D decals

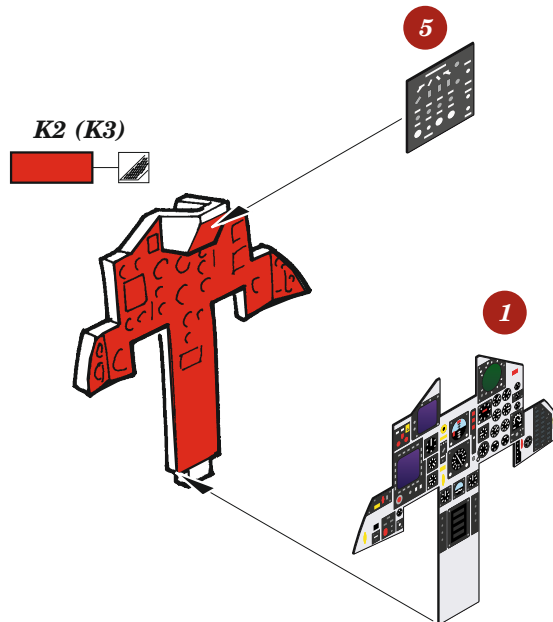

•Vložte na několik vteřin do teplé vody a po oddělení od podkladového papíru naneste na model.

•Pro zvýšení přilnavosti lze použít disperzní lepidlo, Mr. Mark Setter či obtisk nanášet na lesklý povrch.

•Příliš dlouhé vystavení 3D obtisku vodě může způsobit jeho nabobtnání.

PE parts

•K lepení použijte kyanoakrylátové lepidlo.
